#### V. EFFECTS OF CHANGES IN THE ORGANIZATIONAL STRUCTURE

During the period of 3 months ended 31 March 2013, the Issuer's organizational structure did not undergo any significant changes.

**VI. ACCOUNTING POLICIES APPLIED  
WHEN PREPARING THE  
CONSOLIDATED FINANCIAL  
STATEMENTS**

**1. Basis for preparation of interim  
condensed consolidated financial  
statements**

These interim condensed consolidated financial statements were prepared in accordance with the historical cost convention, except for derivative financial instruments and assets that are carried at fair value through profit or loss.

The presentation currency of these interim condensed consolidated financial statements is Polish zloty (PLN), and all figures are presented in thousands of zlotys (PLN'000), unless stated otherwise.

These interim condensed consolidated financial statements were prepared on a going-concern basis, assuming the Group, Parent Company as well as its subsidiary companies will continue their business activities in the foreseeable future.

Till the date of approving these financial statements, we have not observed any circumstances that would threaten the Company and the Group companies' ability to continue as going concerns in the period of at least 12 months following the balance sheet date.

**2. Compliance statement**

These interim condensed consolidated financial statements have been prepared in conformity with the International Financial Reporting Standards ("IFRS") as adopted by the European Union and, in particular, in accordance with the International Accounting Standard 34 *Interim Financial Reporting*. In these interim consolidated financial statements, the Group has not opted for the early adoption of any standards or interpretations which have not become effective yet.

Some of the Group companies maintain their accounting books in accordance with the accounting policies set forth in their respective local regulations. The interim condensed consolidated financial statements include adjustments not disclosed in the accounting books of the Group's entities, which were introduced to adjust the financial statements of those entities to the IFRS.

**3. Significant accounting policies**

The major accounting policies adopted by ASEE Group have been described in the consolidated financial statements for the year ended 31 December 2012, which were published on 20

February 2013 and are available at the Issuer's website: [www.asseco.com/see](http://www.asseco.com/see). These interim condensed consolidated financial statements do not include all the information and disclosures required for annual consolidated financial statements and therefore they should be read together with the Group's consolidated financial statements for the year ended 31 December 2012.

The accounting policies adopted for drawing up this report are coherent with those applied for preparation of the Group's consolidated financial statements for the year ended 31 December 2012, except for applying the amendments to standards and new interpretations effective for annual periods beginning on or after 1 January 2013.

**4. Functional currency and reporting  
currency**

The functional currency applied by the Parent Company as well as the reporting currency used in these interim condensed consolidated financial statements is the Polish zloty (PLN).

Separate and consolidated financial statements of the Group companies are drawn up in the functional currencies of their primary business environments. The functional currencies of direct subsidiaries of ASEE S.A. include the Romanian leu (RON), Croatian kuna (HRK), Serbian dinar (RDS), Macedonian denar (MKD), euro (EUR), Turkish lira (TRY), Bulgarian lev (BGN), Bosnia and Herzegovina convertible mark (BAM), and Polish zloty (PLN).

**5. Changes in estimates**

In the period of 3 months ended 31 March 2013, our approach to making estimates was not subject to any substantial change.

**6. Professional judgement**

Preparing consolidated financial statements in accordance with IFRS requires making estimates and assumptions which impact the data disclosed in such financial statements. Despite the estimates and assumptions have been adopted based on the Group's management best knowledge on the current activities and occurrences, the actual results may differ from those anticipated. The main areas which, in the process of applying the accounting policies, were largely subject to the management's professional judgement remained unchanged as compared with their description presented in the annual financial statements for the year 2012.

## **7. Seasonal nature of business**

The Group's business operations are subject to seasonality, which involves revenue fluctuations in individual quarters of the year. Because bulk of sales revenues are generated from the IT services contracts executed for large companies and public institutions, the fourth quarter turnovers tend to be higher than in the remaining periods. Such phenomenon occurs for the reason that the above-mentioned entities close their annual budgets for implementation of IT projects and carry out investment purchases of hardware and licenses usually in the last quarter.

## **8. Changes in the presentation principles applied**

In the reporting period we have changed the layout of items disclosed in the consolidated income statement. This change involved the introduction of two additional lines, i.e. *cost of goods and third-party services sold*, and *production costs*. Up until now, both the items were disclosed in aggregate, in a single line as the cost of sales. We have also ceased to present the *gross profit on sales* which was calculated by deducting the cost of sales from sales revenues. Furthermore, we have introduced a new subtotal representing the *surplus of revenues over third-party costs* which is calculated by deducting the cost of goods and third-party services sold from sales revenues. The *surplus of revenues*

*over third-party costs* is not a standard line defined by the IFRS. This amount is an indicator used by the Group to plan and measure its operating performance. Such changes have been made in order to harmonize the presentation of data with the management approach, to increase their usefulness for understanding of our financial performance, as well as to facilitate the projection of financial results.

Apart from those described above, we have not introduced any other presentation changes in the reporting period.

## **9. Changes in the accounting policies applied**

In the reporting period, the Group has not introduced any changes to the applied accounting policies, except for adopting the amendments to standards and new interpretations effective for annual periods beginning on or after 1 January 2013.

Likewise, the Group has not changed the method for valuation of financial instruments measured at fair value.

## **10. Corrections of material errors**

In the reporting period, no events occurred that would require making corrections of any misstatements.

<b>Normalized profit for the reporting period</b>	<b>1,868</b>	<b>2,865</b>	<b>-35%</b>

\*Normalized profit for the reporting period is calculated as "Net profit for the reporting period" adjusted for gains on non-recurring transactions recognized as financial income.

One-off transactions recognized in the 1<sup>st</sup> quarter of 2012 resulted from a revaluation of deferred payments for the acquisition of shares in the following subsidiaries: EST, ASEE Bulgaria, and Altius Bulgaria, adding up to a total income of EUR 0.17 million.

In the 1<sup>st</sup> quarter of 2013, sales revenues denominated both in PLN and EUR decreased by 4% as compared to the 1<sup>st</sup> quarter of 2012.

Despite the falling revenues, the surplus of revenues over third-party costs increased by EUR 231 thousand or by 2%, confirming the long-observed trend of a growing share of higher added value solutions in the structure of the Group's sales. The above-mentioned increase is owed primarily to the financial results achieved by the Systems Integration segment in Turkey, Serbia and Macedonia.

Despite a slight increase in the surplus of revenues over third-party costs, in the 1<sup>st</sup> quarter of 2013, ASEE Group's net profit on sales as well as operating profit deteriorated by 20%. Lower profitability was, among others, the effect of investment processes continued by the Group. The development of the Group management functions, expansion into new markets, as well as non-capitalized product development expenditures incurred in the 1<sup>st</sup> quarter of 2013 have all resulted in an increase of operating expenses by nearly EUR 170 thousand as compared to the corresponding period last year.

The second substantial cause behind the decline in the Group's profitability, as previously indicated in the Annual Report for 2012, were problems encountered by ASEE Romania in the Systems Integration segment, whose surplus of revenues over third-party costs decreased by 23% in the 1<sup>st</sup> quarter of 2013, which they were not able to fully compensate by reducing their operating costs. The Systems Integration segment is intensifying its sales activities in order to expand its orders backlog for the second half of 2013. It is also expected that the political environment in Romania will be much more stable in 2013, which should contribute to the implementation of IT projects for the public administration, and thereby better utilization of EU funds. Concurrently, ASEE Romania has undertaken restructuring actions aiming at further reduction of its operating costs.

Operating profit generated by ASEE Serbia for the 1<sup>st</sup> quarter of 2013 was also lower. Its EBIT deteriorated by EUR 201 thousand as compared to the 1<sup>st</sup> quarter last year, primarily due to higher spending on research and development of banking products which were not capitalized (EUR 146 thousand) as well as higher costs incurred in the

Systems Integration segment which have not yet contributed to an increase in sales.

The Group's net profit decreased more than its operating profit, among others, due to non-recurring transactions which improved net profit for the comparable period by EUR 170 thousand. Net profit adjusted for the effect of a revaluation of deferred payments for the acquisition of subsidiaries has been presented in the above table, in the line of

### Net profit on sales by segments

Net profit on sales by segments	3 months ended 31 March 2013 (unaudited)	3 months ended 31 March 2012 (unaudited)
Banking Solutions	3,828	5,656
Payment Solutions	4,770	3,830
Systems Integration	1,241	2,836
	<b>9,839</b>	<b>12,322</b>

When analyzed by operating segments, net profit on sales for the 1<sup>st</sup> quarter of 2013 decreased most in the segments of Banking Solutions and Systems Integration.

In the first segment, such decline was due in particular to lower profits achieved by ASEE Romania and ASEE Serbia, as well as weaker quarterly sales of leasing solutions in Turkey.

### Analysis of financial ratios

PLN '000	3 months ended 31 March 2013 (unaudited)	3 months ended 31 March 2012 (unaudited)
Margin 1	61%	57%
EBITDA margin	13%	14%
Operating profit margin	10%	12%
Net profit margin	8%	12%
Return on assets (ROA)	7%	9%
Return on equity (ROE)	6%	7%

The above ratios have been computed using the following formulas:

Margin 1 = surplus of revenues over third-party costs / sales revenues

EBITDA margin = (operating profit + depreciation and amortization) / sales

Operating profit margin = operating profit / sales

Net profit margin = net profit for the reporting period attributable to Shareholders of the Parent Company / sales

Return on equity (ROE) = net profit for the reporting period attributable to Shareholders of the Parent Company / average annual equity attributable to Shareholders of the Parent Company

Return on assets (ROA) = net profit for the reporting period attributable to Shareholders of the Parent Company / average annual assets

Normalized profit for the reporting period. Another significant factor resulting in a higher percentage decrease of our net profit was the withholding tax charged on dividends paid out by subsidiary companies to ASEE S.A. Such withholding tax increased by EUR 290 thousand as a result of the higher amount of dividends paid out by our subsidiaries in the 1<sup>st</sup> quarter of 2013.

In addition, profits of the Banking Solutions segment were adversely affected by non-capitalized costs of software development, which increased by EUR 117 thousand in comparison to the 1<sup>st</sup> quarter of 2012.

Whereas, in the Systems Integration segment, the largest decreases of net profit on sales were observed in ASEE Romania and ASEE Serbia.

Once again, favourable financial results were recorded by the Payment Solutions segment, where net profit on sales improved by EUR 226 thousand in comparison to the 1<sup>st</sup> quarter of 2012, mainly due to stronger sales of virtual payment solutions in ASEE Turkey and physical payment solutions in ASEE Macedonia.

Margin 1, representing the relation of the surplus of revenues over third-party costs to sales revenues, improved by 4 pp in the 1<sup>st</sup> quarter of 2013 and reached 61% due the growing share of higher added value products in the structure of the Group's sales.

EBITDA margin for the reporting period fell by 1 pp, while operating profit margin decreased by 2 pp, both in comparison to 2012. In the reporting period, net profit margin dropped by 4 pp, which was more than the decline in operating profit margin. This was mainly a consequence of non-recurring transactions conducted in 2012 as well as withholding tax charged on our profit, as described above.

It was similar in the case of return on equity which equalled 6% or 1 pp less than a year ago, and return on assets which equalled 7% and was 2 pp lower than in 2012. Having excluded the effects of non-recurring financial transactions recognized in 2012, both ROE and ROA ratios remained at comparable levels in both the analyzed periods.

	<b>31 March 2013 (unaudited)</b>	<b>31 Dec. 2012 (unaudited)</b>	<b>31 March 2012 (audited)</b>
Working capital (in PLN thousands)	138,882	130,488	152,810
Current liquidity ratio	2.86	2.48	2.69
Quick liquidity ratio	2.51	2.22	2.41
Absolute liquidity ratio	1.19	1.08	1.28

The above ratios have been computed using the following formulas:  
 Working capital = current assets - current liabilities  
 Current liquidity ratio = current assets / current liabilities  
 Quick liquidity ratio = (current assets - inventories - prepayments) / current liabilities  
 Absolute liquidity ratio = (bonds and securities held to maturity + cash and short-term bank deposits) / current liabilities

All the liquidity ratios remained at the levels similar to those observed in 2012.

In the 1<sup>st</sup> quarter of 2013, we incurred no unusual expenses, which resulted in an increase of working capital. Whereas, in comparison with its level of 31 March 2012, working capital decreased chiefly due the acquisition of Sigma for PLN 29.5 million in 2012 and payment of PLN 18.6 million in dividends.

Goodwill is the main component of assets of ASEE Group. An increase in goodwill reported in 2013 is attributable to the depreciation of the Polish zloty against foreign currencies in which individual items of goodwill are denominated (e.g. the appreciation of the Serbian dinar by 4%, the Turkish lira by 4%, and the Romanian leu by 3%).

Property, plant and equipment and intangible assets grew by a total of PLN 4.5 million, primarily due to higher expenditures incurred for the development of the Experience family products in Serbia, mobile payment solutions in Turkey, ASEBA family products in Croatia, as well as Fidelity Spend Management and LeaseFlex products in our Turkey-based subsidiary Sigma.

In 2013, we observed a slight increase in equity financing over debt financing. As at 31 March 2013, equity accounted for 89% of total equity and liabilities, rising from 88% as at 31 December

2012. Whereas, the share represented by current liabilities decreased following their decline from PLN 88,229 thousand as at 31 December 2012 to PLN 74,763 thousand as at 31 March 2013.

### Statement of cash flows

	<b>3 months ended 31 March 2013</b>	<b>3 months ended 31 March 2012</b>
	<small>(unaudited)</small>	<small>(unaudited)</small>
<b>Cash and cash equivalents at the beginning of the period</b>	<b>74,133</b>	<b>103,042</b>
Net cash provided by (used in) operating activities	2,128	9,081
Net cash provided by (used in) investing activities	(12,530)	6,983
Net cash provided by (used in) financing activities	(1,863)	(481)
Net foreign exchange differences	1,748	(6,947)
<b>Cash and cash equivalents at the end of period</b>	<b>63,616</b>	<b>111,678</b>

The low amount of cash provided by operating activities, representing only 20% of our pre-tax profit, is primarily attributable to changes in working capital. In the 1<sup>st</sup> quarter of 2013, trade receivables of our subsidiary ASEE Macedonia increased considerably as a result of the execution of significant contracts in the Systems Integration segment. Additionally, cash flows from operating activities were lower following a decrease in liabilities of ASEE Romania and ASEE Croatia.

The above described changes in working capital should be non-permanent, and their reversal in the future should improve cash flows from operating activities in the coming quarters.

Net cash flows from investing activities were negative as ASEE S.A. invested its spare cash in financial assets carried at fair value (money market funds) and made bank deposits with maturities exceeding 3 months. Another substantial item of investing cash flows included expenditures for development projects carried out mainly in Serbia, Turkey, and Croatia.

The negative cash flows from financing activities resulted primarily from dividends paid to the former shareholders of our Turkish subsidiary Sigma, which was agreed as part of the acquisition of that company by the Group.

### X. FACTORS THAT IN THE MANAGEMENT'S OPINION MAY AFFECT THE GROUP'S FINANCIAL PERFORMANCE AT LEAST TILL THE NEXT QUARTER END

The factors that will affect the Group's financial performance at least the end of the next quarter have been indicated and explained as part of the summary and analysis of the financial results of ASEE Group in section IX of this report.

The factors that may affect the Group's financial performance in 2013 have been also described in the Management's report on the Group's business operations for the year 2012.

**XI. EXPLANATORY NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**1. Breakdown of sales revenues**

During the 1<sup>st</sup> quarter of 2013 and in the comparable period, operating revenues were as follows:

	31 March 2013 (unaudited)	31 March 2012 (unaudited)

	<b>100,967</b>	<b>105,278</b>

**2. Surplus of revenues over third-party costs**

In the consolidated income statement for the reporting period, we have introduced a new line representing the surplus of revenues over third-party costs, which is calculated by deducting the cost of goods and third-party services sold from sales revenues. This reflects the amount of surplus remaining to cover the Group's own costs, including production costs, distribution costs, and general administrative expenses. This amount is one of the key indicators used by the Group to plan and measure its operating performance. It is characterized by a greater degree of comparability and stability than revenues, especially in the segment of Systems Integration, where fluctuations in sales have a lower impact on the operating profit basically due to low margins realized.

The *surplus of revenues over third-party costs* is not a standard measurement and has not been defined by the IFRS. Understanding and the method of calculating this indicator may vary depending on the approach taken by individual entities.

The amount owed by ASEE Group corresponds to the estimated present value of future payment for the remaining stake of shares in the above-mentioned company. The assumptions adopted for valuation of this liability have been described in the financial statements for the year 2012 and remained unchanged over the 1<sup>st</sup> quarter of 2013. This put option liability was lower as at 31 December 2012 than as at 31 March 2012 following a downward revision in the expected net earnings of the subsidiary, which provide basis for the calculation of the amount payable. Higher amounts of long-term deferred income disclosed as at 31 March 2013 and 31 December 2012, as compared to 31 March 2012, resulted from the recognition by ASEE Turkey of grants received for capitalized software development costs, which will be recognized in the income statement in parallel with the amortization charges on such software.
